Index

A

Acetate, C^{14}-labeled, effect of diet on uptake into lipids of chick, 15.
Adenosine triphosphatase and ATP-P_i exchange in mitochondria of essential fatty acid-deficient rats, 411.
Aedes aegypti L. larvae, antimetabolites in nutrition of. Thiamine, riboflavin and pantothenic acid antagonists, 419.
AKOV, S., AND K. GUGGENHEIM. Antimetabolites in the nutrition of *Aedes aegypti* L. larvae. Thiamine, riboflavin and pantothenic acid antagonists, 419.
Algae, green, protein quality in mixtures of powdered milk and cereals, 23.
Almond (*Prunus amygdalus*), evaluation of in Middle Eastern diets, 235.
American Institute of Nutrition awards, invitation for nominations for 1964, 91.
— — — — Fellows, invitation for nominations for Fellows, 93.
— — — —, invitation for nominations for honorary membership in, 94.
Amino acid(s) balance in the adult rooster: high nitrogen — low tryptophan diets, 230.
— — balance and imbalance. XII. Effect of imbalance on self-selection of diet by rat, 363.
— — in dog blood and gut contents after feeding zein, 343.
— —, supplementation of cereal proteins with. VI. Effect of amino acid supplementation of rolled oats as measured by nitrogen retention of young children, 399.
— — supplementation of wheat gluten, effect of delay on capacity to promote growth in the weanling rat, 379.
ANDRUS, S. B. See Mogami, Takeo, 39.
Anemia, baby pig, effect of iron supplementation of sow rations on the prevention of, 187.
Antimetabolites in nutrition of *Aedes aegypti* L. larvae: thiamine, riboflavin, and pantothenic acid antagonists, 419.
Arachidonate, conversion of linoleate to, and inhibition by dietary linolenate, in rat, 67.
Arachidonic acid and linoleic acid, action upon eicosatrienoic acid level in rat heart and liver, 110.
L-Ascorbic acid and erythorbic acid, human metabolism of, 163.
Ascorbic acid and pantothenic acid, interrelationships in young guinea pig, 415.
ASHIDA, KIYOSHI. See Muramatsu, Keiichiro, 427.
ATP-P_i and adenosine triphosphatase exchange in mitochondria of essential fatty acid-deficient rats, 411.

Bromide and chloride deficiency in chicks, 193.
BRUSH, M. K. See Fisher, Hans, 230.

C

Calcium and phosphorus, excess, relationship to magnesium requirement and toxicity in guinea pigs, 175.
— — vitamin intakes, varying, effect of sodium fluoride on rats with, 81.
— metabolism in man, effect of lysine on, 301.
— — — rat, effect of egg white diets on, 218.
Calculi, renal, in rat, interrelations among magnesium, vitamin B_6, sulfur and phosphorus in formation of, 60.
Calorie(s) restriction and body weight in rat. IV. Fecal nitrogen, fat, energy, and ash and urinary creatinine, 117.
— and protein intake, effect on weight gain in malnourished infants, 249.
CAMPBELL, J. A. See Cowan, J. W., 235.
Carbohydrate(s) and water, effects on PER in rats, 87.
CARLTON, W. W., AND WILSON HENDERSON. Cardiovascular lesions in experimental copper deficiency in chickens, 200.
Cereal(s) proteins, supplementation of by amino acids, 399.
Chagas' disease, in laboratory rats, effect of lysine deficiency on, 169.
CHANEY, C. H., AND C. E. BARNHART. Effect of iron supplementation of sow rations on the prevention of baby pig anemia, 187.
CHAPULA, WILLIAM, AND HANS FISHER. Comparative protein evaluation studies by carcass retention and nitrogen balance methods, 139.
CHAREONCHAI, AMORNRAT, AND RALPH M. JOHNSON. Effect of fasting on the incorporation in vitro of palmitate-C^{14} into glycerolipids of mitochondria, 387.
CHARKEY, L. W., AND D. E. HOUGHAM. Glutathione and the antithyrotoxic effect of methionine, 255.

Chicken(s), cardiovascular lesions in experimental copper deficiency in, 200.
—, chloride deficiency in, 193.
—, effect of diet on uptake of C^{14}-labeled acetate, glucose and leucine into lipids of, 15.
—, effect of oleic and linoleic acids on absorption of saturated fatty acids in, 321.
—, glutathione and antithyrotoxic effect of methionine in, 255.
—, growing, fatty acid composition of plasma on liver lipid components as influenced by diet, 357.
—, influence of dietary menhaden oil on growth rate and tissue fatty acids, 123.
—, lack of effect of urease injection on growth rate and feed efficiency of, 30.
—, liver nucleic acid, protein and lipid patterns in, during Newcastle disease virus infection, 48.
—, vitamin B_{12} and DNA biogenesis in, 372.
Chiemchaisri, Y., and Paul H. Phillips. Effect of dietary fluoride upon the magnesium calcinosis syndrome, 307.
Children, effect of amino acid supplementation of rolled oats as measured by nitrogen retention of, 399.
Chloride deficiency in chicks, 193.
—, serum and muscle, and muscle moisture, effect of diet on, in rat, 99.
Cholesterol and cholic acid supplements, effects on rats fed low iodine diets, 39.
— ester metabolism, dynamic aspects of, in rabbits with atherosclerosis, 263.
—, free and total, in human blood fractions, 241.
—, serum, effect of low protein diets on, in rat, 131.
— -supplemented diet and fatty acid changes in growing chick, 357.
Cholic acid and cholesterol supplements, effects on rats fed low iodine diets, 39.

SARETT, HERBERT P. See Harkins, Robert W., 81.
SATO, TAKAHIKO. See Muramatsu, Keiichiro, 427.
SAUBERLICH, H. E. See Leveille, G. A., 357.
SCRIMSHAW, N. S. See Bressani, R., 399.
SHAPIRO, R. See Fisher, Hans, 230.
SIDRANSKY, HERSCHEL, ETHEL VERNEY AND BENITO LOMBARDI. Factors influencing the induction of fatty liver by orotic acid, 348.
SMITH, ELVEDA. See Hawthorne, Betty, E., 241.
SMUTKO, CHARLES J. See Keane, Kenneth W., 87.
SOSTMAN, E. R. See Fisher, Hans, 230.
Soybean(s) sprouts, nutritional value of protein in rat, 279.
— trypsin inhibitor, effect on methionine and cystine utilization in rat, 392.
— and development of fatty liver in rat, 348.
— foods, Oriental, nutritional value of proteins of, 279.
SPENCER, HERTA, AND JOSEPH SAMACHSON. Effect of lysine on calcium metabolism in man, 301.
STANDAL, BLUEBELL R. Nutritional value of proteins of Oriental soybean foods, 279.
Starvation, semi-, conservation of serum components during, 405.
STIELAU, W. J., AND J. H. MEYER. Periodic B-vitamin supplementation of growing rats fed a vitamin-free diet, 330.
STOWE, HOWARD D., AND C. K. WHITEHAIR. Gross and microscopic pathology of tocopherol-deficient mink, 287.
Succinic dehydrogenase activity, changes in, and fatty acid composition of rat liver mitochondria in essential fatty acid deficiency, 103.
Survival and weight gain in rats alternately fed large and small quantities of ration, 35.
—, nutrition and biochemistry of during Newcastle disease virus infection. I. Liver nucleic acid, protein and lipid patterns in chicks, 48.
SQUIBB, ROBERT L. Nutrition and biochemistry of survival during Newcastle disease virus infection. I. Liver nucleic acid, protein and lipid patterns in chicks, 48.
SWELL, LEON, M. D. LAW AND C. R. TREADWELL. Dynamic aspects of cholesterol ester metabolism in rabbits with atherosclerosis, 263.

T

Thiamine and toxicity of pyrithiamine in nutrition of *Aedes aegypti* L. larvae, 419.
—, anti-, activity dependent on thiamine level in rat tissue, 147.
—, effect on degree of phosphorylation of oxythiamine, 147.
—, microbially synthesized, availability in the rat, 183.
Threonine and lysine delayed supplementation of wheat gluten, effect on capacity to promote growth in the weanling rat, 379.
TILLOTSON, J. A. See Leveille, G. A., 357.
Tocopherol-deficient mink, gross and microscopic pathology of, 287.
Tofu, nutritional value of protein, in rat, 279.
Toxicity, dietary molybdenum, in rat, possible mechanisms for, 271.
TREADWELL, C. R. See Swell, Leon, 263.
Tricarboxylic acid cycle intermediates, action of vitamin A on liver homogenate oxidation of, 383.
Trypanosoma cruzi infection of laboratory rats fed gluten, 169.
Tryptophan, low, and high nitrogen diets; amino acid balance in adult rooster, 230.

U

URBIN, M. C. See Lushbough, C. H., 99.
Urease injection, lack of effect on growth rate and feed efficiency of chicks and rats, 30.

V

Vegetable oil(s) and fats, vitamin E content of, 335.
VENTURA, U. See Rindi, G., 147.
VERNEY, ETHEL. See Sidransky, Herschel, 348.

Vitamin(s) A, action on liver homogenate oxidation of tricarboxylic acid cycle intermediates, in rat, 383.
— B_{12} and DNA biogenesis in chicks, 372.
— B_6, magnesium, sulfur and phosphorus, interrelations among in formation of kidney stones in rat, 60.
— B periodic supplementation of growing rats fed vitamin-free diet, 330.
— E content of vegetable oils and fats, 335.
— E requirement related to polyunsaturated fatty acids, 335.
— K deficiency and oxidative phosphorylation, 17.
— and calcium intakes, varying, effect of sodium fluoride on rats with, 81.

W

Wagner, G. R., E. L. Nichols, R. H. Kohlmeier, S. L. Balloun and V. W. Hays. Lack of effect of urease injection on growth rate and feed efficiency of chicks and rats, 30.
Walker, Brian L., and Fred A. Kummerow. Dietary fat and the structure and properties of rat erythrocyte lipids, 75.
Water, addition to purified diet. II. Effects of water and carbohydrate on PER in rats, 87.
Weight, body and caloric restriction. IV. Fecal N, rat, energy and ash and urinary creatinine, 117.
— gain and survival in rats alternately fed large and small quantities of ration, 35.
— —, decrease with increased intervals between B-vitamin supplementation in growing rats, 330.
Weimer, Henry E., James F. Godfrey, Roberta L. Meyers and James N. Miller. Effects of food restriction and re-alimentation on serum proteins: complement levels and electrophoretic patterns, 405.
Wessels, J. P. H. See Fisher, Hans, 230.
Wheat gluten, delayed supplementation of lysine and threonine, effect on capacity to promote growth in weanling rat, 379.
Whitehair, C. K. See Stowe, Howard D., 287.
Wilson, D. L. See Bressani, R., 399.

Y

Yaeger, Robert G., and O. Neal Miller. Effect of lysine deficiency on Chagas' disease in laboratory rats, 169.
Young, R. J., and R. L. Garrett. Effect of oleic and linoleic acids on the absorption of saturated fatty acids in the chick, 321.
Yudkin, John. Availability of microbially synthesized thiamine in the rat, 183.

Z

Zein, amino acids in dog blood and gut contents after feeding, 343.
Zinc, copper and molybdenum interrelationships, effect on placental transfer of Zn^{65} in rat, 312.
